A 2.5D platformer where the goal is to reach the end of each level whilst avoiding various obstacles along the way. With only 12 levels, taking 20-30 minutes to complete I would not recommend spending the base price of £32.09 on the game, wait until it is on sale. Along with this game, if you complete it you get 1596 achievements which is nice if you are an achievement hunter like me.

1 thing that ruined this game for me is the camera. As it moves depending on which direction you are looking at which meant some times you could not even see what you were doing. This shown in the video "trailer" between 35 and 50 seconds in. Other then that, this is a pretty solid simplistic 2.5D platformer which is great to play if you have 30 minutes to kill!.
