## About This Content

The heavyweight of UK freight is coming! The updated General Motors built Freightliner Class 66 V2.0 'Shed' is now available for Train Simulator, with scenarios for the Edinburgh-Glasgow route.

The Class 66 was introduced to the UK in 1998 as a replacement to the popular Class 59, using the same body shell as its forerunner but with updated power units, internal fittings, new computer control systems, radial steering bogies and 3,000hp engines. In total, 446 of the Class were built, quickly making the Class 66 the diesel freight locomotive of choice among UK freight operators, including Freightliner, GB Railfreight, Direct Rail Services and EWS, mainly for freight operations but also with some charter passenger services on their roster. Their popularity has also seen variations of the Class 66 enter service for European operators as a result of their versatility.

The Freightliner Class 66 V2.0 for Train Simulator is a re-worked model of a previous version, with an updated and improved interior and re-modelled exterior. Available in Freightliner livery, the model features accurate brake control and centre-sprung brake lever, accurate engine and horn sounds, FEA-B Spline and KTA Pocket intermodal container wagons. Scenarios specifically for the Edinburgh-Glasgow route are also included.

The [Edinburgh-Glasgow Add-On](#) (available separately) is required to play the scenarios included with this Add-On.

## Scenarios

---

Three scenarios for the Edinburgh-Glasgow route:

- Cadder Misty Morning
- Intermodal Run Around
- Keeping out of the Rush

More scenarios are available on Steam Workshop online and in-game. Train Simulator's Steam Workshop scenarios are free and easy to download, adding many more hours of exciting gameplay. With scenarios being added daily, why don't you check it out now!

Title: Train Simulator: Freightliner Class 66 v2.0 Loco Add-On

Genre: Simulation

Developer:

Dovetail Games

Publisher:

Dovetail Games - Trains

Franchise:

Train Simulator

Release Date: 12 Dec, 2012

a09c17d780

**Minimum:**

**OS:**Windows® Vista / 7 / 8

**Processor:**Processor: 2.8 GHz Core 2 Duo (3.2 GHz Core 2 Duo recommended), AMD Athlon MP (multiprocessor variant or comparable processors)

**Memory:**2 GB RAM

**Graphics:**512 MB with Pixel Shader 3.0 (AGP PCIe only)

**DirectX®:**9.0c

**Hard Drive:**6 GB HD space

**Sound:**Direct X 9.0c compatible

**Other Requirements:**Broadband Internet connection

**Additional:**Quicktime Player is required for playing the videos

Cool freight train with wierd sound and brakes but thats fun!. I got this in the uk collection by DTG so I wasn't sure what I was expecting. I have usual 66s coming through my area so I was intrigued to see what this was like. And I can say... YES YES YES!! Here's why...

PROS-

The model is amazing, looks exactly like it should  
The engine sounds are great, not to quiet, not to load  
The cab looks as it does in real life  
Brakes are great, I mean really great. A lot of fun there  
Has nice acceleration with long trains

CONS-

The horn is a bit dodgy, but I guess I'll let that slip.

I 1000000000000000% recommend this.. Provides an additional 3 scenarios to the Edinburgh-Glasgow route.

Mainly deals with freight hauling to\from specific locations.

I would possibly expect this loco to be integrated into other additional routes with this type of loco being fairly universal throughout the British Isles\UK.

Overall, decent. Can't complain.. Hard to reccomend due to the livery problem, but I got it in the UK Collection Bundle.. I love the DLC with the AP sound pack ,but RSC made a great light and livery texture , love to use it in scenarios , thank you DTG for making it public this is why I own reskins , this claggy noisy beast. Nice freight loco and rake of cars for the sim. I'm not a fan of the 66's Braking system but it really doesn't matter :).

17\17. The Class 66 Freightliner in TS. For one thing, why does it come with the UK Collection but the scenarios are for Edinburgh-Glasgow. Also, did it need to be seperate from the EWS version which is nearly the same. The sounds, heh heh heh, did you expect them to be correct? You gotta get the AP sound pack. Overall, I can't give it a good review. 3.5\10. Thanks for reading. It is a good train for haulin' stuff. Nuff said.. This train is by far one of the best to be released by Dovetail. The model looks great. The cabin is stunning and the sounds are beautiful.

Total reccomend, 10\10

---

Great Sounds  
Great Carriages and Wagons

Terrible horn  
Perfect for Collection

8V10. A great looking locomotive with genuine sounds, all sadly let down by a lacklustre horn. The wipers are also setup wrong, as on the real life loco's they operate from left to right on the driver side and vice versa for the secondman. The braking system is very bizarre too and actually takes some getting used too, but once that is all out of the way, it is a good locomotive to drive and a great AI locomotive for scenarios.. I got this when I bought the UK Collection bundle. It is a nice add-on in my opinion and it is commonly used in a lot of workshop scenarios made by the train simulator community that covers the UK trains. The physics are good and the sounds are okay. But the horn is hilarious though as it sounds like a synthesizer more than an air horn. But if you get the Armstrong Powerhouse Class 66 sound pack. That solves the horn issue.

The locomotive comes with some intermodal wagons and three scenarios for the Edinburgh to Glasgow route that I also have and they are okay. But you will get more fun from this locomotive if you use it in your own scenarios like I do. A very nice modern UK freight locomotive add-on and I would recommend getting this in the UK Collection bundle as you get more add-ons for your money.

Overall Rating: 9V10.. Drove red ones for real, this ones green ;- ) not bad for a ying ying shed thingy. Ridiculous!!! the in cab graphics are AWEFULL.... to say i have seen better in cab graphics in BVE!!!!!

the horn sounds are pretty naff too :(

On the other hand though... external graphics are pretty good and playability is good.

Just a shame it has an awful paper cut out style poor graphical cab not to mention the awful wipers :V. First off, lets get the positive out of the way first. The class 66 model is very good indeed....

On to the bad. The EWS 66 was launched a couple of months before this (which i purchased), then this, which is just a reskin and a couple of senarios and NOW they have lunched the powerhaul. ALL of these are full price (\u00a311.99) and are just reskins of each other with some senarios...

SHAME ON YOU DTG you bunch of robbing so and so's.... you are just exploiting the general public as these should just be the class 66 with different liveries like what you did with the class 31. If Just trains and Armstrong powerhouse can do this to give the customer value for money then you can as you have done it before!

Buy 1 class 66 and get some reskins and you'll be very happy.
